Software Design and Analysis Lab, Carnegie Mellon University Pittsburgh, PA
Research Assistant; Advisor: Prof. Eunsuk Kang, Prof. Matthew L. Bolton May 2023 – Present

- Extended Fuzzy Mental Model Finite State Machines (FMMs) for modeling human mental model, developed an Alloy-based model checker and an analysis tool to detect mode confusions in FMMs [2] [8]
- Researched use cases and HCI aspect for ATLAS, a tool that solves the constrained LTL learning problem through an encoding in a first-order relational logic and reduction to an instance of the MaxSAT problem [1]
- Conducted a usability study on an open-source EHR system and developed a tool to auto-generate erroneous workflows from software interactions through Carnegie Mellon's REU (REUSE) program.

Barnard Programming Language Lab, Columbia University New York, NY
Research Assistant, Advisor: Prof. Mark Santolucito May 2022 – Sep 2024

- Formalized, engineered, and evaluated a machine-learning based run-time validation approach for maintaining the system integrity for system migrations [7]
- Finetuned and benchmarked an LLM pipeline for generating Temporal Stream Logic (TSL) spec [9]
- Designed and implemented user interfaces, and conducted user studies for TSL [4] [5]
